Mobile: [+91 7061389997](tel:+917061389997)

SKILLS

Languages: Java, Python, SQL, JavaScript
Backend & APIs: Spring Boot, FastAPI, REST APIs, WebClient, JWT Auth, WebSockets
Frontend: React, Vite, HTML, CSS, Tailwind CSS, Framer Motion
Databases & Caching: PostgreSQL, Redis, Caffeine Cache
DevOps & Tools: Docker, Git/GitHub, Vercel, Render, Railway, VS Code
Data & ML: NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, TensorFlow, Power BI, Excel
Soft Skills: Problem-Solving, Team Player, Project Management, Adaptability

PROJECTS

- F1 Intelligence Hub | [Link](#)

June 2026

 - Built a full-stack Formula 1 analytics platform delivering live driver standings, constructor, standings, and race data, with a FastAPI backend deployed on Render and a React/Vite frontend deployed on Vercel.
 - Integrated the Jolpica API as the live data source and resolved production-blocking issues including CORS misconfiguration and a deprecated upstream API endpoint, restoring end-to-end standings functionality.
 - Designed a responsive, F1-themed UI with driver comparison views and dynamic data rendering for race statistics.

Tech Used: Python, FastAPI, React, Vite, Jolpica API, Render, Vercel
- BallKnowledge | [Link](#)

May 2026

 - Developed a football analytics platform delivering live match tracking, league standings, player statistics, and team performance insights using real-time football APIs.
 - Designed and implemented scalable backend services in Java Spring Boot, including RESTful APIs, layered architecture, DTO handling, centralized exception management, caching, and Docker-based deployment support.
 - Improved backend efficiency and scalability by integrating Caffeine caching and automated cache-refresh scheduling with Redis-compatible configurations, reducing API response time and external API dependency.

Tech Used: Java, Spring Boot, React, REST APIs, WebClient, Caffeine Cache, Docker, JSON
- Real-Time AQI Alert System using Java | [Link](#)

Mar 2026

 - Built a Java-based air quality monitoring system that fetches real-time AQI data from the OpenWeather API and flags unsafe pollution conditions.
 - Implemented JSON parsing, AQI analysis logic, and automated email alerts using the JavaMail API and SMTP integration.
 - Enabled real-time pollution monitoring and instant notification delivery, improving awareness and response to hazardous air quality levels.

Tech Used: Java, OpenWeather API, JSON Parsing, JavaMail API, SMTP

TRAINING

- Lovely Professional University | [Link](#)

Jun 2025 – Jul 2025

Tech Used: Python, NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn, NLP

 - Completed an intensive Summer Training Program in AI & ML, applying machine learning techniques to real-world problems.
 - Gained hands-on experience in supervised and unsupervised learning using Linear Regression, KNN, Decision Trees, and Clustering.
 - Performed data preprocessing (scaling, encoding, missing-value handling) and built models with NumPy, Pandas, and Scikit-Learn, visualized using Matplotlib and Seaborn.
 - Developed an interactive mental-health chatbot using NLP techniques (text preprocessing, tokenization, sentiment analysis) to interpret user input and generate supportive responses.

CERTIFICATES

- ChatGPT, Generative AI & LLM | [Link](#)

Aug 2025
- Language Principle & Finite Automata Theory | [Link](#)

Aug 2025
- Python for Data Science, AI Development | [Link](#)

Feb 2024
- Legacy Responsive Web Design | [Link](#)

Oct 2023

EDUCATION

- Lovely Professional University

Bachelor of Technology

Computer Science and Engineering; CGPA:6.73

Phagwara, Punjab

Aug 2023 – Present
- Bishop Scott Boys' School

Intermediate

PCM; Percentage: 72%

Patna, Bihar

Mar 2021 – May 2022
- Bishop Scott Boys' School

Matriculation

Percentage: 75%

Patna, Bihar

Mar 2019 – May 2020
